Manufacturer Provided Description

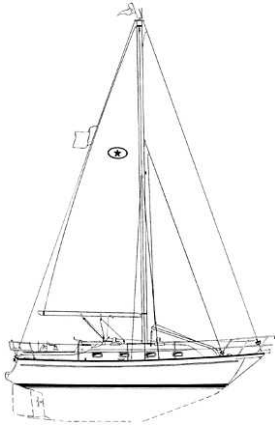

The Island Packet 320 combines the extensive building, sailing, and hands-on design experience that have made Island Packet Yachts one of America's Cruising Yacht Leaders. Integrating owner feedback representing millions of miles of practical cruising experience around the world, noted naval architect Bob Johnson - Island Packet's founder and CEO - has produced the 320,

The Full Foil keel continues as the foundation of the Island Packet concept, and its design and construction provide a host of advantages to the cruising sailor: moderate draft for access to a wider variety of cruising grounds, integral one piece construction for superior strength, a highly effective airfoil shape for excellent windward performance, and a modern hull form for enhanced speed and maneuverability. In addition, the safety and seakeeping offered by this keel design provide both peace of mind and additional comfort underway.

While Bob Johnson insists his designs are, "first and foremost excellent cruising yachts," the performance of these yachts has earned them an impressive number of victories in prestigious offshore races around the world.
